

Color Rigid Metal Conduit

Submittal Sheet

Western Tube color rigid metal conduit (RMC) comes in eight vibrant colors for easy differentiation of important circuits in any tough environment. Color RMC is precision-rolled, producing a clean, homogeneous weld structure and a smooth, burr-free interior surface. The rust-resistant, powder-coated finish won't crack, flake or peel, and the UV protective coating prevents fading to ensure long-lasting performance. Western Tube color RMC is available in trade sizes ½-4.

Listing

Western Tube color RMC is UL® Listed to UL-6. It is manufactured in accordance with ANSI® C80.1 and CSA C22.2 No. 45.1 and federal specification WW-C-581.

Locations

Western Tube color RMC meets National Electrical Code® (NEC) Article 344's requirements for use in indoor and outdoor locations and in wet and dry locations, including Class 1 Division 1 hazardous locations. It may be used for both exposed and concealed installations.

Testing

Western Tube performs regular tests of its color RMC for weld strength, plating thickness, threadability, all dimensions, and uniform smoothness of the interior and exterior coatings.

Coatings

Western Tube color RMC is hot-dip galvanized on both the interior and exterior, receives a chromate conversion coating, and then receives an organic polymer coating to defend against corrosion.

Color Standards

Color RMC from Western Tube is constructed the same way and meets the same requirements as our standard RMC, and it is available in red, white, blue, green, yellow, orange, purple and black.

Threading

Western Tube color RMC is simultaneously threaded on both ends, ensuring straight runs.
